

Phenomenon.

In some ways our story is like many top-tier video content companies found in LA and NY. Front-line technology. Talented visual artists. Innovative thinking and fresh techniques. Award-winning work. Great people. But in many ways we're different. Like the diversity of our **experience**.

We've worked for some of the nation's largest retailers. Some of the most respected non-profit organizations. Most celebrated professional sports franchises. Hall of Fame Rock Groups. Famous restaurant chains. Innovative health insurance and healthcare providers.

We believe creative video content that can't be produced on a reasonable budget is not creativity at all. From TV advertising, to documentary filmmaking, to content for every possibility of a digital work, Phenomenon knows how to tell your story with creative and innovative thinking. Effective and efficient production, on-time and on-budget.

That's our story. If you like what you hear then it's time to talk about how we can tell your story... together.

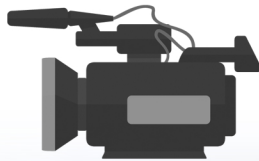

Project Development
Concept To Creation
